## JOHN HAMMEL CROSSES DIVIDE

The sad word of the death of John Hammel, a Carbon citizen for the past 20 years, was reported on Monday morning, the deceased having passed away at 3 a.m. that day.

The late John Hammel came to this part of Alberta from North Dakota 20 years ago and made his home in Carbon, carrying on the occupation of farmer. He was married here in 1911, and leaves to mourn his loss a sorrowing wife, his parents, who reside in Carbon, and six brothers and four sisters. The deceased was born on February 8, 1879 and was 50 years, eleven months and 26 days of age.

The late John Hammel has been a member of the Independent Order of Foresters for the past 19 years. Funeral services will be conducted this afternoon, Thursday, from the Anglican church and will be in charge of Rev. Attwood of Calgary. "Thy Will Be Done"

## CARD OF THANKS

I wish to thank all those for their kind assistance and sympathy during my recent sad bereavement and especially do I extend to Dr. McFarlane my sincere appreciation of his services.

MRS. (JOHN) HAMMEL

## SCHOOL REPORT FOR JANUARY

GRADE IIA—Margaret Wheat, Isabel Gouldie, Jimmy Gouldie, Elaine Torrance and Bill Code, Milly Hunt, Elwood Kaehn, Mae Moore, Harvey Barker, Bernard Moore, Annie Lemay, Mary Shyja, Doris Gauletz, Gordon McGregor, Billy Rogers.

GRADE IIB—Albert Bramley, Irene Grenier, Annie Shyja, George Moore, Edward Batsch, Billy Heath, Lucille Lemay, Victor Kaehn. Absent for tests, Robert Ramsey.

GRADE IA—Pauline Schoeppe, Betty Willson, Marjorie Shale, Ralph Atkinson, June Collins, Ellen Hedberg, Lillian Dixon.

GRADE IB—Mary Mayers, Zena Trumbley, Duncan Code, Arbor Collins, Boleck Sobyski, Albert Batsch, Lawrence Trepanier.

## W. A. BRAISHER AND L. G. MCQUADE NOMINATED FOR 1930 COUNCILLORS

At a public meeting of the Village electors on Monday night in the Elks hall, there were no complaints laid against the Village council for the past year. A vote of thanks was tendered to the old council for their untiring efforts in doing their best in the interests of the Village, and each councillor, J. A. MacDonald, S. Garrett and Jas. Flaws in turn thanked the people for their co-operation, etc. during the past year.

Following this meeting was the nomination of councillors for this year to fill the vacancy of Mayor J. A. MacDonald on the Council board, and the names of W. A. Braisher, and L. G. McQuade were put forth. We understand that the election will take place on Monday next.

## CARBON AND BEISEKER PLAY TIE GAME OF HOCKEY

The best hockey game of the season was played at the local rink last Thursday night when the Beiseker boys clashed with Carbon, the game ending with a score of 2-2 after ten minutes of overtime was played.

The line-up of the teams were as follows:

Beiseker—Goal, Black; Defence, Bulst and Waymark; forwards, Ashen, Florendine, Anderson, Schmaltz, Uferman and Vorrath.

Carbon—Goal, Halstead; Defence, A. R. Lynn, and W. Hilton, Forwards, S. Hay, J. Taylor and E. Rouleau, Jack Spence, B. Ramsay and G. Oliphant.

The Beiseker goals were scored by Anderson on an assist from Bulst, and by Florendine.

Carbon's goals were scored by J. Taylor, and by Hilton.

General Manager, Bank of Montreal

## LITTLE ITEMS OF LOCAL INTEREST

Dennis Wilson was a Carbon visitor from Calgary last week.

Miss Gore of Swallowell is visiting here with her sister, Mrs. R. Wacker.

Miss Vera Poxon was a Calgary visitor over the week end.

Miss Daphne Nash went into the city on Monday for a few days holiday.

We understand that an interesting game of hockey was played at the rink last Saturday morning between the Cubs and the C.G.I.T.

W. Hilton was a visitor to the city on Saturday and returned Monday evening.

It has been reported that Mr. Gatineau, a Carbon old timer, had died last week in Florida, U.S.A.

Mrs. O. Kellar arrived Tuesday night from San Francisco to attend the funeral of her father, John Hammel.

The annual meeting of the Joint Pastoral Charges of Carbon, Gamble and Beveridge Lake of the Carbon United Church will be held in the United Church Carbo n, on Monday evening, February 10th at 8 p.m. Reports will be given by all departments of the church, followed by a social evening. The ladies of the Carbon Ladies' Aid will serve refreshments. A full attendance is requested.

## WHEAT

Wheat is planted extensively in the Canadian west, to keep the producer broke and the buyer crazy.

There are an unlimited number of grades and the man who can guess in earnest the correct one is called a "wheat grader" by the public and a "fool" by the farmer.

The price is determined in some mythical town somewhere. It goes up when you have sold and down when you have bought.

Brokers should always advise their clients as follows: "Some think it will go up; some think it will go down. So do we. Whatever you do will be wrong. Act at once."

Wheat is planted in May, mowed in June, hauled in July, frozen in August, and plowed under in September. You can and you can't. You will and you won't. You will be damned if you do and be damned if you don't.

## A Notable Crowd

Speaker: "And where, I ask you, is Julius Caesar? Where is Attila the Hun? Where are Moses, Robert Bruce, Charlemagne, Hannibal?"

Enthusiastic Usher: "Stand up, boys so's the gent can see you."

Grandfather—"I never see a blush on a girl's cheek now. It was different in my day."

Flapper—"Oh, Grand-dad, what did you say to them?"

## CARBON BONSPIEL IS POSTPONED

The Carbon bonspiel was away to a good start on Tuesday morning at 8 a.m. and the ice was in good condition till about noon that day, when a chinook wind started to blow. The games were played on tough ice for the remainder of Tuesday's games and Wednesday morning, on account of the water on the ice, it was decided to postpone the bonspiel till the weather turned a little colder and in the meantime we are getting out the paper. At the time of going to press it has not been decided just when the bonspiel will be finished, but it is to be hoped that it will turn colder tonight so that play can continue.

There are 18 rinks entered in the bonspiel and in all three competitions.

## "SILVER RIBBONS" COMMENCES IN CHRONICLE THIS WEEK

The new serial story commencing in The Carbon Chronicle this week is "Silver Ribbons," a story of love and adventure of a young girl who has inherited much from her parents and grandparents. The story was written by Christine Whiting Parmenter last year and the book is one of the latest editions on sale at book stands.

"Hey you," called the constable at the notorious driver. "Why don't you use both hands?"

"I'm afraid to let go the steering wheel," grinned the very irrepressible youth at the wheel.

\*\*\*\*\*

We know many women who are not strong on logic, but who generally do the right thing. They're like watches that point to the correct time, but have themselves no idea how they do it.

## FARM LANDS FOR SALE

In Township 29, Range 22, W. 4th M., Alberta.

TENDERS marked 24634 addressed to L. F. Clarry, Esq., K. C., Master in Chambers, Court House, Calgary, will be received up to 11 o'clock in the forenoon of Friday, the 28th day of February, 1930, for purchase of lands in the township and range above noted, as follows:—

N.W. 2; N.E. 3; N.E. 10, except 9.02 acres for Right of Way, etc.; Pt. S.E. 15, South of Kneehill Creek 12.83 acres; N.W. 1; N.E. 2; S.W. 12, excepting 1.20 acres for Right of Way, etc.; Pt. E. 1/2 11, containing 293.93 acres. Containing in all 1257 acres more or less, all as more particularly described in existing Certificates of Title.

LOCATION—Midway between Carbon and Drumheller, 2 1/2 miles from Hesketh.

SOIL—Black loam and clay subsoil, about 800 acres good arable land and the rest pasture.

IMPROVEMENTS—500 acres cultivated (160 acres summerfallow, 640 acres stubble), log house 18 x 27, log stable 16 x 20, 3 miles of fencing, Well with fair water supply.

TERMS OF SALE—5 per cent with tender, 20 per cent on acceptance of tender, 25 per cent in 3 months, 25 per cent in 6 months and the balance in 9 months from date of acceptance of tender. Balance of purchase price to bear interest at 8 per cent per annum.

In all other respects the standing conditions of sale will apply.

Tenders will be received for all of said lands or in separate parcels and must be accompanied by marked cheque for 5 per cent of the offer, which will be returned in the event of non-acceptance. No tender necessarily accepted.

For further particulars apply to John J. Petrie, Esq., 322A - 8th Avenue, West, Calgary, Alberta.

DATED at Calgary, Alberta, this 28th day of January, 1930.

## A New Hope For The World

The five-power naval conference is in session in London, England, as this article is written. It is a momentous gathering, fraught with great possibilities for the good of all mankind. Assembled around the conference table are leading statesmen of Great Britain, United States, France, Italy and Japan, the five greatest naval powers in the world. The British delegation also includes representatives of the self-governing Dominions and India.

The problem confronting these eminent statesmen is to find some basis of agreement whereby a stop can be put to further competitive building of ships for warlike purposes, and, if possible, to provide for a substantial reduction in the number of existing ships by scrapping some now in commission and providing that there shall not be replacement of others when they become old and obsolete.

So worded, the average man would be inclined to say that it should not be a very difficult matter to reach an agreement, but the problem is by no means so simple as it seems to the layman. One country places greater reliance on huge battleships than does another country, others desire many fast cruisers of moderate tonnage, others feel their necessities call for larger cruisers, some want a great number of submarines, while others are prepared to outlaw them altogether. Great Britain is ready to abolish both submarines and the huge battleships, and rely on cruisers of moderate tonnage. The United States is agreeable to the outlawing of the submarine, but still feels the necessity of the big ship. France is opposed to abolishing submarines. And so it goes.

And there is something to be said for each contention. Great Britain has colonies and coaling stations, oil and supply depots all over the world. The moderately sized cruiser will, therefore, fit into her requirements for defence of her great shipping and commerce. But other countries, lacking such re-fueling and supply depots, feel the need of larger ships, carrying greater quantities of fuel and supplies, so as not to be forced back to home ports too frequently. France is convinced that the submarine is her great arm of naval defence inasmuch as she cannot hope to compete with Britain and the United States in the building and maintenance of large battleships and cruisers.

However, the conference is a hopeful sign of the desire of the nations to lessen the burden of armaments and consequently to decrease the possibility of war. One thing is certain, and that is that the people in all countries are extremely anxious that their leaders should succeed in reaching some unanimous conclusions. They are the ones who have to bear the burden of taxation imposed for these huge armaments; it is their sons who are withdrawn from productive employment to man the navies, and undergo intensive training for possible future slaughter.

The most hopeful feature of the present conference is that it has been preceded by conferences between the nations at which efforts have been made to find common ground, to iron out old differences, to allay old suspicions. The conference may not achieve all that might be hoped for and desired, but if it marks a further advance on the work of the Washington Conference of some years ago, much will be gained, and the way be paved for further reductions and understandings in another few years. Thus step by step will progress be made.

An example of this willingness to consider and appreciate the other fellow's viewpoint and position, instead of ignoring or misrepresenting them, is found in a recent issue of the Philadelphia Evening Bulletin. It states some home truths for its United States readers. To quote in part:

"The salt water, I believe, is freest of all, in peace, within that jurisdiction—the British—where it was formerly (in centuries past) least free. Britain accords the peaceful world, so far as her writs run, complete maritime freedom and equality, even within her own ports and coastal waters. Her port charges are the same to others as to British. Foreign ships may take part in her coastwise trade.

"Her broad theory is that maritime commerce, under whatever flag it may move, holds out some hope of profit to the greatest contemporaneous seafaring peoples. No other nation is of like mind—not the Italian, not the French, not the Japanese, not the American. Our coastwise trade, for example, is reserved rigidly for vessels of American registry, and none other may ply between our home ports and those of our overseas territories."

Recognition of this broad liberty accorded to the shipping of all nations by Britain, as contrasted with the narrower policy adhered to by all other great naval powers, thus openly presented to the readers of a great United States paper, is an indication of that better and more cordial feeling towards Britain now so evident in the neighboring republic. It is because such better feelings do exist, and are growing stronger, that hopes for the success of the present naval conference are so high.

## When Food Sours

About two hours after eating many people suffer from sour stomachs. They call it indigestion. It means that the stomach nerves have been overstimulated. There is excess acid. The way to correct it is with an alkali, which neutralizes many times its volume in acid.

The right way is Phillips' Milk of Magnesia—just a tasteless dose in water. It is pleasant, efficient, and

harmless. It has remained the standard with physicians in the 50 years since its invention.

It is the quick method. Results come almost instantly. It is the approved method. You will never use another when you know.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

### Canada's Cabinet Ministers

Oldest Is Hon. W. R. Motherwell, and Youngest Hon. C. A. Dunning

Hon. W. R. Motherwell, Minister of Agriculture, who has just celebrated his seventieth birthday, is the oldest member of the Dominion Cabinet. The youngest is Hon. C. A. Dunning, who at 45 is Minister of Finance. The others are: Postmaster-general Veniot, 66; Minister of Interior, Stewart, 61; Minister of Health, King, 57; Minister of Public Works, Elliott, 57; Prime Minister King, 55; Minister of Labor, Heenan, 54; Minister of Customs, Euler, 54; Minister of Justice, Lapointe, 53; Minister of Railways, Crerar, 53; Minister of Marine, Cardin, 50; Minister of Trade and Commerce, Malcom, 49; Minister of National Defense, Ralston, 48; Secretary of State, Rinfret, 46; Solicitor-General, Canon, 42; Minister of Immigration, Forke, who has just resigned, was 69. Including the last named, this makes an average of about 55 for the seventeen, a figure which for that class of work affords the vigorous age classification.

### University Of Alberta

Debaters Win a Three To One Verdict Over Manitoba In Inter-University Contest

Piling up a conclusive argument which completely controverted that of their opponents, University of Alberta debaters recently defeated the University of Manitoba by a three-to-one verdict of the judges for the McGoun Cup.

Alberta speakers upheld the affirmative of the subject, "Resolved that total disarmament is essential to world peace."

The debaters for Alberta were David Sigler and F. E. L. Priestley, and for Manitoba, Ronald M. MacDonnell and R. Gerald Riddell.

### CAN YOU WITHSTAND RIGORS OF WINTER?

Or Are You Subject To the Many Ills Of This Trying Season?

The rigors of winter sap the vitality of even the strongest. Lack of exercise, overheated rooms and a restricted diet will gradually impoverish the blood and impair the health. That is why you are susceptible to colds—why you find such difficulty in throwing them off.

To be proof against cold, flu or other winter ailments the body must be nourished by rich, red, health-giving blood. A tonic medicine must be taken to build up this rich, red blood. Such a tonic is Dr. Williams' Pink Pills—thousands recommend them as a remarkable blood-builder and winter tonic.

Concerning them Mrs. Jackson Jenkins, Owen Sound, Ont., writes: "After a severe attack of flu I found myself very much run-down. I was advised to try Dr. Williams' Pink Pills and they fully restored my health and strength. I can heartily recommend these Pills to anyone whose blood is in an impoverished condition."

Start taking Dr. Williams' Pink Pills today and see how soon you feel the benefit. They are sold by all medicine dealers or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

### Discover Cancer Serum

Two San Francisco Surgeons May Make Important Contribution To Medical Science

Discovery by two San Francisco surgeons of what they call a "cancer killing serum," was disclosed when it became known that medical agencies of the University of California have decided to co-operate in further experiments with the substance.

The originators, Dr. Walter Bernard Coffey, chief surgeon of the Southern Pacific Hospital, and Dr. John D. Humber, his colleague, specified that the serum was not to be regarded as a cancer cure, but asserted that it was able to kill cancerous tissues.

The serum is derived from the outcyle of the adrenal glands of sheep.

Only the uninformed endure the agony of corns. The knowing ones apply Holloway's Corn Remover and get relief.

A British printer has discovered a method of producing luminous ink in various colours, for reading in the dark.

Grandmother Knew—She Used Minard's.

W. N. U. 1823

## Needless Pain!

Don't be a martyr to unnecessary pain.

Lots of suffering is, indeed, quite needless. Headaches, for example. They come without warning, but one can always be prepared. Aspirin tablets bring prompt relief. Keep a bottle of them at the office. Carry the small tin in your pocket. Then you won't have to hunt a drugstore, or wait till you get home.

And do not think that Aspirin is only good for headaches, sore throats, and colds! Read the proven directions for relieving neuralgic, neuritic, rheumatic, and other aches and pains. Remembering, of course, that the quick comfort from these tablets is not a cure; for any continued pain, see a doctor.

Purchase genuine Aspirin. Protect yourself by looking for that name. Always the same. Always safe. Never hurts the heart.

### Good Speakers Nervous

Would Get Out Of Addressing Crowds If It Were Possible

Right Hon. Jan Christian Smuts, war hero and leading statesman, during a memorable address in Toronto, said: "I have never learned in a long political life to shake off a certain nervous trepidation when I have to face my fellow-men in mass formation. And I am not sure that the political mass formation is not more terrifying than the military formation." No doubt many other public men could tell of similar feelings. The Hon. William Paterson, one of the best known campaign speakers in Canada, told a friend with whom he was discussing his political career, that despite his lengthy experience in addressing public gatherings, if at any meeting just before he arose, somebody had opened a door behind him he would have bolted through the portal.

### Canadian Steamships

New Canadian Government Ship-Building Deal Is Rumored

The London Sunday News states that a large shipbuilding contract for a new Canadian Government line of passenger and cargo steamers may shortly be placed in Liverpool.

The newspaper stated contracts had already been invited for construction of a fleet of ships to run between Montreal and Cape Town and India.

# Canada Is Largest Exporter Of Wheat In the World and Ranks Second In Production

In the comparatively short period of three-score years, Canada has emerged from an insignificant position in world production to that of the largest exporter of wheat, and ranks second (excluding the Russian Soviet Union), as a producer of wheat, raising, on an average, about ten per cent. of the total world production, only the United States exceeding Canada in this regard.

Wheat and flour were exported from the Dominion during the crop year 1928-29, to nearly 80 countries, the total amounts being 351,424,689 bushels of wheat, and 11,808,775 barrels of flour. Total world exports of wheat and wheat flour, expressed in bushels of wheat, amounted to 1,002,439,000 bushels for the 12 months ended July 31, 1929, of which Canada contributed over 40 per cent.

The British Isles took 209,571,743 bushels of Canadian wheat and 2,637,867 barrels of flour, more than one-half of the total exported. Japan was the Dominion's next best customer of wheat with 22,700,487 bushels; the Netherlands were third with 22,121,680 bushels; Belgium fourth with 16,577,716 bushels; Italy fifth with 15,571,311 bushels, and Germany sixth with 14,693,724 bushels. The other purchasers of Canadian wheat are widely scattered throughout the world.

China was first in the list of consumers of flour with 3,040,667 barrels, surpassing the British Isles which took 2,637,867 barrels as above. Germany stood third with 1,097,289 barrels.

Flour produced from the crop of 1928, made a new record for the flour milling industry in Canada. During the crop year ended July 31 last, wheat ground in commercial flour mills totalled 94,795,316 bushels as compared with 86,842,296 bushels during the crop year 1927-28. This is an increase of over 7,950,000 bushels. Flour produced amounted to 20,893,252 barrels as compared with 18,910,384 barrels for the previous year. This increase amounted to 1,982,868 barrels of flour.

During the same period exports of wheat and flour amounted to 11,808,775 barrels, and 9,865,754 barrels respectively. The increase in exports was 1,943,021 barrels, or practically identical with the increase in flour production.

During the crop year 1928-29, Canada made new records in the production and export of wheat and in the manufacture of wheat flour. In addition to her position in the "wheat field," Canada produces nearly ten per cent. of the world's oats, and ranks eighth in cheese production, and fifth in that of butter.

## Contests Canada's Claim

### South Africa Says It Has World's Record Milk Producer

South Africa is contesting the claim made in a cable from Ottawa that a Canadian Holstein cow, "Teake Waldorf" is the world's record milk producer. South Africans claim an Orange Free State cow, "Butterfly," produced no less than 30,004 pounds of milk in 365 days, containing 1,254 pounds of butter. The yield is verified by an official government test. Furthermore, there are a number of other cows in South Africa which have surpassed "Teake Waldorf's" record, it is stated.

"Shall we escape from the dull company?"  
"I can't. I am the host."—Hummel, Hamburg.

## Grain Elevators In Operation

### Saskatchewan Has Four Thousand According To Recent Check

More than 4,000 grain elevators are now in operation in Saskatchewan, according to a check made by G. T. Thomson, who conducted the first inspection of such facilities, a new activity inaugurated as a preliminary to the operation of the new Workmen's Compensation Act. All the modern elevators were found to be provided with safety devices, the first report revealed, though some of the older ones were found to be in need of additional protection equipment.

## Winnipeg Newspaper Union

(By Annebelle Worthington)

Chic dressmaker details are smartly evident in printed sheer velvet tiered model in striking independence blue coloring.

The swathed hip with crystal buckle emphasizes the higher waistline so important in the mode. The irregular closing of collarless neckline is unusually becoming. A buttoned applied trimming band holding jabot frill, denotes new smartness.

Sleeves have darts below elbows. The circular tiers sway gracefully each time wearer moves.

It proves that good taste is not expensive, for here is a Paris model that you can copy exactly at the cost of the fabric, and have the added advantage of choosing a flattering colour.

Design No. 3015 comes in sizes 16, 18 years, 36, 38, 40 and 42 inches bust.

It is exquisite in plain transparent velvet in dahlia purple for afternoons and informal evenings.

Black crepe satin is dignified for all-day occasions. It is very effective made of the dull surface with the tiers displaying the shiny surface.

Canton crepe in vintage red, army blue crepe de chine, and crepe Elizabeth in Marron Glace are outstandingly smart.

Pattern price 25 cents in stamps or coin (coin preferred.) Wrap coin carefully.

## Taking Safety Measures

### Compensation Accidents Are Showing a Considerable Increase In Ontario

A New Year's resolution which we recommend to everyone may be summarized in the expression "Safety First." The advice is not new; it has been given frequently in many shapes, but the necessity for it remains. The Workmen's Compensation Board, of Ontario, for example, reports that during 1929, the accidents coming under its notice numbered 87,103, which was 7,705 more than in 1928, and that benefits awarded amounted to \$8,102,157, which was an increase of nearly \$1,000,000 over the previous year. These increases, both in number and in benefits are out of all proportion to the growth of population. Industries are not becoming more hazardous nor are there many new ones which, in their nature, make employees more liable to accident. We do not know the reasons for these increases, but it is evident that still more care must be taken in all the trades which come under the jurisdiction of the Workmen's Compensation Board. In other walks of life the number of accidents is probably also increasing. One reason for this is the growing popularity of motors for both passenger and freight services. The streets are far more dangerous than they used to be, and it behooves all to exercise the greatest care in moving along or across them. In urging "Safety First," no one is properly open to the charge of teaching timidity. The fact is that bravado shows lack of common sense whether in trades or other occupations, in sports or in the simplest actions of life. To exercise a fair amount of caution should be a universal rule.—Mail and Empire.

## The Brandon Fair

### Sixtieth Anniversary Of Entry Into Confederation Will Be Commemorated This Year

Manitoba's sixtieth anniversary of her entry into the confederation will be made the outstanding feature of the provincial exhibition, at Brandon, this year. Directors of the fair have decided to further plans in this connection, and attractions which will add to the occasion are under review.

It is probable that the exhibition will have several stand out attractions over and above the regular programme to be outlined for the association of western Canada exhibitions.

An important item under discussion will be the completion of the racing programme for all western fairs. For the first time, all of the exhibitions have decided to feature only running events, and as a result they will be able to offer inducements to the gallopers and a better balanced programme than previously. The matter of midway shows contracts will also be decided on at the meeting.

The Kansas City Star is at peace with all the world except the English who drive on the wrong side of the road, can't spell tires, call gasoline petrol, and call a radio set a wireless." However, we doubt whether the English will be much moved in view of the fact that the editor of the Star drives on the wrong side of the road, can't spell tyres, calls petrol gas, and calls a wireless a radio set.

# Regulations Governing Oil And Gas In Turner Valley Recommended By Commission

## Mechanizing the Farm

### 66,220 Tractors Now In Use In the Prairie Provinces

Though the popularity of "Old Dobbin," as the farm horse is affectionately known, continues to hold a prominent place on the farms of Canada, the "Iron Horse," or the mechanical farm implement, is advancing in popularity, particularly among farmers in the three Prairie Provinces—Manitoba, Saskatchewan and Alberta. There are, according to a recent estimate, a total of 66,220 tractors, in operation on the 248,162 Canadian prairie farms, 14,557 of which were bought last year. In Manitoba there are 12,346; in Saskatchewan, 35,083; and in Alberta, 18,791 farm tractors.

The total of harvester-combines in use on the Prairies at the end of 1929, was 7,726, of which 3,295 were bought last year. In 1926 only 176 harvester-combines were sold. The following year the sales were 598. In 1928 they jumped to 3,657, an increase over the previous year of 611 per cent. Sales of threshers in the three Prairie Provinces last year totalled 2,095.

## Canada Popular With Tourists

### About Nine Million People From U.S. Visited Dominion Last Year

The growing popularity of Canada among tourists is indicated by the recent official estimate that about 9,000,000 persons from the United States visited the Dominion last year. Of this number 250,000 visited the national parks of Canada. Canada maintains 23 national parks and reserves located in different parts of the country with a total area of over 29,000 square miles. In these parks the outstanding natural beauties and wild life are presented. Hunting of game is forbidden and any visitor entering one of the parks or reserves with a gun must submit to having it sealed before entering.

## Saskatoon Exhibition Surplus

### Date Of Exhibition For This Year Fixed For July 21 to 26

A surplus of \$10,667.23 is reported by the Saskatoon Industrial Exhibition Board covering operations in 1929. This is considered very satisfactory in view of crop conditions at the time of the fair. The year featured large increases in exhibits of livestock, agricultural and industrial products, and the erection of three new buildings in the grounds. This year the date of the exhibition is fixed for July 21st to 26th.

The man who deals in sunshine,  
Is the man who gets the crowds.  
He does a lot more business  
Than the one who peddles clouds.

The saddest news of the week is the story of the ambitious youth who joined the Navy to see the world and spent four years in a submarine.

## Old Timer Retires

Back in 1882 when the Canadian Pacific Railway was pushing through the bush in Northern Ontario on its way across the continent, this old-time engine did a lot of good work and it was fired by James T. Fallon, who had joined the road three years previously. On the last day of 1929, Fallon, for over forty years an engineer, closed more than fifty years of railroad service. His picture is inset with that of the old locomotive, No. 222, sister to the one on which he worked as a youth.

Adequate regulation of the production of oil and gas in Turner Valley is recommended by the conservation commission appointed last year by the Federal Government. The commission has reported to the government and the report has been made public. The members of the commission were Dr. Charles Camsell, deputy minister of mines; A. W. G. Wilson, Charles Ross, R. C. Wallace and A. A. Carpenter.

After pointing out that the wastage of gas in Turner Valley now approximates 200,000 cubic feet per day, was equal to 9,000 tons of high grade coal, the report states the position as follows:

"It is obvious that in the Turner Valley present operations are rapidly and wastefully dissipating a great natural resource only about 10 per cent. of which is usefully employed. This wastage takes place through the operations under license of about 40 producing companies. It is probable that the number of producers will be increased shortly and that the wastage also will increase. Only about 30 per cent. of the area is operated under government license, the mining right of about 70 per cent. having been alienated from the crown many years ago.

"These producers are primarily interested in obtaining as great a naphtha recovery as possible in as short a time as possible. No voluntary steps of consequence have been taken to curtail wastages or to prolong the lives of the wells. While it may be to the advantage of the individual producer to obtain quick return from his investment, it is decidedly not in the national interest, nor is it in the ultimate interest of the producer himself to permit this rapid dissipation without utilization of a great national asset for the immediate benefit of a few."

In regard to a solution, the report recommends:

"The only solution which will make conservation possible is recognition of the fact that Turner Valley is a gas field and the formulation of rigid regulations for the purpose of controlling all phases of the gas producing industry. If existing legislation is not adequate to protect the public interest it should be redrafted to meet the situation. These regulations should be administered uniformly by one body representing both federal and provincial parliaments. This is the first and most important step to be taken. Other measures can only be palliative. This action is also a prime essential to the further development of industries based on the presence of this gas supply in Alberta.

"Without regulation and without control of production, industries cannot be assured of an adequate supply of gas over a period of time long enough to warrant essential capital investments. New supply is not only to investments in the new distributing pipe lines but also to investment in manufacturing industries using natural gas and to the development of industry based on chemical and metallurgical research. If adequate regulation is provided a limited industrial development will result."

## Canada's Progress Phenomenal

Characterizing Canada's developments during the twentieth century as relatively the most phenomenal the world has ever known, exceeding even the unprecedented development of the United States in the nineteenth century, Col. J. H. Woods, Calgary, president of the Canadian Chamber of Commerce, delivered an inspiring address on the country's future development at a banquet of the Woodstock Board of Trade.

"Please I want a car to match this dress."—Lustige Kiste, Leipzig.

## MAY EFFECT BIG REDUCTION IN NAVAL STRENGTH

London, Eng.—Rt. Hon. A. V. Alexander, first lord of the admiralty, told the House of Commons that Great Britain's cruiser strength in naval estimates for the next ten years would depend on the results of the Five Power Naval conferences.

Asked what increase or decrease for the next two five-year periods of the naval estimates would result from fixing the number of cruisers at fifty, he replied: "There are at present 51 British cruisers built, and four others in an advanced stage of construction."

"The effect on the British estimates of fixing the total at fifty cruisers depends on the size of the cruisers laid down and the type of the cruisers built to replace those that become obsolete."

"The decision on these questions depends on the conclusions of the naval conference."

According to figures that Mr. Alexander gave to another questioner, the saving in the British naval estimates for the next six years would aggregate more than £52,000,000, if replacements of battle-ships as provided in article 20 of the Washington Treaty were deferred until 1936.

Mr. Alexander also told a questioner that decision as to proceeding with the three submarines remaining on the British 1929 naval program would be taken after the London conference had been concluded. The program originally provided for six submarines but three of these were later cut out.

The recent cancellation of two British cruisers was of no material significance, Mr. Alexander told a questioner who asked the reason for the abandonment and the effect of the decision on the unemployment situation.

"The suspension of work on these ships," he said, "was decided upon by the Government on July 1st, for reasons of high policy fully set out in a statement the prime minister made in the House of Commons, Jan. 14. As very little work had been done on these ships on that date the recent decision to regard them as cancelled is of no material significance and was taken in connection with the framing of the navy estimates."

The first lord of the admiralty said it had not been necessary to reduce dockyard employment in consequence of stopping work on these and other ships.

### Endurance Test a Success

British Dirigible in Air For Fifty-Three Hours

Cardington, Eng.—The dirigible R-100 returned to her home port after a successful endurance flight lasting 53 hours.

The giant airship during that time flew a zigzag course over the southern part of England, crossed the channel to the Scilly Islands, flew back over Plymouth, the Isle of Wight, Dover, the Southeastern coast ports and once again over London.

She started in misty weather and arrived home in a mist.

### Suggests Help For Byrd

New York, N.Y.—Dr. Howard T. Barnes, of McGill University, has suggested that chemicals might be used to hasten the break-up of the South Polar ice pack if Admiral Byrd desired it. The work would be done, Prof. Barnes said, by forcing one vital break in the pack at the key point and the manoeuvring an actual shifting of the ice mass.

### B.C. Honors Pioneer Women

Victoria.—The legislature of British Columbia, in its opening ceremonies paid tribute to the pioneer women of the province, who had helped lay the foundations of Canada on the Pacific. A dozen pioneer women occupied seats on the floor of the House, and received tributes on behalf of those they represented, the government and opposition.

The Belgian Congo has coal deposits of more than 1,000,000,000 tons.

W. N. U. 1823

## Great Future For Canada

Sir Esme Howard Refers To Dominion's Envyable Position

Ottawa.—A suggestion whereby Canadian trade may be enlarged with the West Indies, a tribute to Hon. Vincent Massey, Canadian minister at Washington, and an expression of confidence in the future of this country were the features of an address delivered before the Canadian Club here by Sir Esme Howard, British ambassador to the United States.

With regard to the Canadian minister at Washington, the British ambassador said that from the day Mr. Massey was appointed to this there had never been a shadow of any sort between them.

"We have discussed matters of common interest and matters of all kinds so freely that we have become friends and almost as brothers. But I should like to say this, that the establishment of the Canadian legation at Washington, so far from creating difficulties for the conduct of the affairs of our British Commonwealth, as some persons supposed, has on the contrary been a real help and assistance in the conduct of those affairs in the United States."

Expanding his theme on Anglo-American relations, Sir Esme pointed to Canada's enviable position in having on its frontiers no hostile neighbor.

"Some think that the north geographical situation of Canada is a drawback," he said. "But I don't feel so sure about that because it ensures you for ever from the danger of the problem of mixed races, which is a most serious one in southern countries; and it ensures you also from the relaxation of mind and muscle which often is the result of too constant contact with the sun god. You are endowed with thousands and thousands of square miles of fertile plains, with millions of horsepower of electricity waiting to be harnessed, with lumber and wood pulp almost incalculable, and lastly with a wealth of mineral deposits which have yet only just been scratched. You have all this and you have also the unspeakable blessing of political security without fear from attack from without."

"Who are your neighbors? On one side the North Pole, whose bears are not likely to prove a danger to this estate; and on the other side a great and friendly country, with whom you have had for over a century an arrangement by which armaments were laid aside and the frontier line was left almost as free from defences as those between one state and another of the United States."

## Manitoba Beekeepers Meet In Winnipeg

Delegates Discuss Betterment Of Conditions Which Are Already Excellent

Winnipeg.—Manitoba bee keepers in the 23rd annual convention at the Royal Alexandra Hotel, discussed ways and means of bettering the already excellent conditions under which this province holds a three-year record in the Dominion for first grade granulated and extracted honey. The report of the secretary, L. T. Floyd, gives Manitoba's entire crop estimate at 6,899,339 pounds of honey, with an average of 144 pounds per colony. There are 2,856 apiaries and the spring and fall count of colonies rates at 47,595 and 42,726 respectively. W. D. Wright, of Souris, Manitoba, representing the district west and south of Brandon, from whence the finest grades come, was congratulated upon winning Dominion sweepstakes this year with practically all the prizes in the classes mentioned during the last three years.

Roy Mullen, of Myrtle, was another outstanding beekeeper, having obtained 26,000 pounds from 100 colonies of bees.

### Pictures Are Proof

Toronto.—Helge Borup, a young Dane, who in three years became a successful farmer in Northern Ontario, has left to spend a holiday in the land of his birth, and in his baggage will be 5,000 feet of film which he will show in many parts of Denmark as pictorial proof that splendid opportunities exist for those who are not afraid to play the part of pioneer.

## WILL LEAD PROGRESSIVE GROUP

H. C. Nixon, who has been selected to lead the Progressive group in the Ontario House during the coming session.

## Authorities Firm On Mennonite Question

Canada Will Not Permit Entry During Winter Months

Ottawa, Ont.—The attitude of the Canadian authorities with regard to the admission into Canada of the 6,000 distressed Mennonites in Germany is unaltered, and no permission will be given to bring them to this country during the winter months. This was stated by officers of the immigration department here. In the spring the department will give consideration to the case of these Mennonites, but no special privileges will be extended to them. Any action taken will be in conformity with the immigration laws and will be governed by the agricultural requirements of Canada then.

## World Grain Show

Manitoba Agricultural Societies Urged To Take An Interest In Big Event

Winnipeg, Man.—An appeal to all societies to arrange at once for representation at the World Grain Show, at Regina, in 1932, was made by J. H. Evans, deputy minister of agriculture for Manitoba, in an address before the agricultural societies convention recently.

Every society in Manitoba should be represented at the show, said Mr. Evans. He rejoiced at the interest manifested by junior seed growers in the production of better seed.

### Motorist Was Rewarded

Ottawa, Ont.—Wilfrid Lebel, young Ottawa motorist, brought a party of skiers home from the Gati-neau Hills when their car broke down on Sunday. He was surprised when members of the party asked to be dropped off at Government House. He went home and forgot about it until he received a letter of thanks from Her Excellency Viscountess Willingdon, accompanied by a handsome bouquet.

## Canadian Scouts Contingent

Governor-General Willingdon Thanks All Those Who Helped To Make Jamboree a Success

Ottawa, Ont.—Success of the Canadian Scouts' contingent who took part in last year's jamboree, in England, was due in large measure to the generous aid of Canadians, said the chief scout for Canada, His Excellency the Governor-General.

"To the generous subscribers in all parts of Canada to the special fund I personally raised for this purpose," said Viscount Willingdon, "I wish to express very grateful thanks, and also to the various individuals who subscribed sums for individual boys, which largely increased the numbers of our contingent. I wish to thank, too, all members of the executive of the association here at headquarters, for their loyal, devoted work, very particularly the members of the jamboree committee, who, under the chairmanship of Colonel Snow, made all the arrangements for this undertaking."

## Copy Was Clever Forgery

Expert Investigated So-Called Draft Of U.S. Declaration Of Independence

Toronto.—Faint pencil marks discovered by a hand-writing expert left no doubt that the so-called draft copy of the United States Declaration of Independence, now in Toronto, was a hoax, says the Mail and Empire in a news story.

"One of the cleverest forgeries ever committed," said the expert when he had completed his investigation. A powerful magnifying glass brought into evidence lead pencil markings about the strokes of the writing, says the paper. These markings indicated, the expert said, that the signature had been carefully drawn then inked in.

## Farm Home Destroyed

Father and Daughter Die From Burns Received In Fire

Kerrobert, Sask.—Burned terribly from neck to knees on both the front and the back of his body, through his heroic efforts to save his children, Lester Matters, Tramping Lake farmer, died in the Kerrobert hospital. He had been there for 24 hours, in intense pain.

His injuries were received when fire practically destroyed his house following an early morning kerosene explosion, nine miles west of Tramping Lake. He and three children sustained burns in the explosion, one little girl, Nellie, aged 14 years, having succumbed to her injuries shortly after admittance to the hospital.

### Prince Studying South Africa

Cape Town, South Africa.—Notwithstanding the fact that during his stay in Cape Town, the Prince of Wales is spending the nearest thing to complete holiday that he has enjoyed in years, he is devoting considerable time to increasing his knowledge of South Africa, her main interest and problems.

### "JAMAICA SUGAR"

They say that little girls are made of sugar and spice and all that's nice. This can truly be said of this little piccaninny because she belongs to the West Indies, where spice and sugar grow. Perhaps she is a little shy because the lady who took such a fancy to her was a very distinguished visitor to her home island. Both, Her Excellency Lady Willingdon, and the Viscount Willingdon, Governor-General of Canada, were highly delighted with their cruise through the Spanish Main. This photograph was taken on board the Canadian National Steamship "Lady Somers."—Canadian National Railways Photograph.

## UNEMPLOYMENT ASSOCIATED WITH POOL POLICY

Winnipeg, Man.—The Canadian wheat pool's policy of holding wheat for higher prices has helped to create the serious unemployment situation as it exists in Canada, Mayor Ralph H. Webb, of Winnipeg, stated recently. His comment made at the western conference on unemployment from the presiding chair, drew pronounced opposition from several delegates.

"I have not attacked the wheat pool in any shape or form," contended Mr. Webb in answer to criticism of his stand. "I am commenting only on the pool's present policy which the pool has a perfect right to practice. I hope it proves to be right."

"Hundreds of thousands of men have been laid off by the railways as a result of the pool's holding policy," estimated the Winnipeg mayor in his first resume of the unemployment situation. He mentioned that the facts that the 1928 crop was not yet paid for, and payments on the 1929 crop were yet to come, as additional items tending to cause unemployment.

Canada should turn an eye to the United States, where "holding policies" have been directed in vain against Great Britain, Mr. Webb believed. He mentioned futile efforts of the United States to hold up Britain on beef, oil, cotton, rubber and tobacco, and resultant British moves to develop other resources.

Australia and the Argentine have quadrupled their wheat yields within nine and seven years respectively, the mayor held; Manchuria was producing 24,000,000 bushels where no wheat was grown six years ago; India had doubled her wheat yield in six years. Italy and France, the former never a wheat-producing country, "were now meeting almost all domestic requirements," he said, "and Germany—ever an importer, was now exporting wheat to Britain."

Subsidized grain-growing, with 4,000,000 or 5,000,000 acres, put into new production in Britain, would be the result of bucking the British, Mr. Webb forecast.

"We may find that the government has had a lot to do with the present policy," stated Mr. Webb, referring to the wheat pool's stand, "and that may not bear very close investigation."

Mayor John W. Hair, of Saskatoon, immediately dissipated himself from the "attack on the wheat pool made by Mayor Webb." He mentioned that Saskatoon is proud of being the centre of Canada's greatest pool province and mentioned that he considered the wheat pool had done far more to create employment than to cause unemployment.

Strong protest against Mayor Webb's statements came from Ben Lewis, of Stonewall, Man., a director of the United Farmers of Manitoba. "These co-operative organizations came into existence through necessity," stated Mr. Lewis. "The farmers refused to produce grain at a loss, and insisted on a living wage. It is because agriculture is in such a low state that the whole country is suffering. Politicians come out into the west, talking of prosperity, while the very causes of the prosperity—the farmers—are almost poverty stricken."

Almost unanimously, at the opening of a western "jobless parley" called in Winnipeg, they stressed the gravity of present conditions, forecast early aggravation of the situation, and opined that the Dominion Government should aid in unemployment relief.

### To Speak Over Radio

London, England.—Lady Astor, Conservative member of the House of Commons, will broadcast over radio to Canada and the United States within about a week. Her address will be designed primarily for women and will urge them to continue their efforts for world peace.

### Another Royal Wedding

Vienna.—Dispatches from Bucharest say that the wedding of Princess Ileana, daughter of Dowager Queen Marie, to Count Alexander, of Pless, has been fixed for the second half of February.

### CHAPTER I.

Doctor Edward Howe, Wickfield's beloved and venerable physician, stopped his car before the old Davis house, while a girl who was vigorously polishing the sidelights by the wide front door turned from her perch on a low step ladder and waved a greeting. The doctor glanced at his watch, and deciding that there was time for a moment's relaxation, got slowly out, threw a smile to Grandma Davis who was at the window, and sat down on the porch below the girl.

"This big house makes you a sight of work, Charmian Davis."

Charmian turned, dropped her polishing cloth and took a seat on the step ladder.

"I suppose it does; but somehow I don't mind—it's such a beautiful house. I like to remember that my father and grandfather were born here, where I was born myself. This old house seems—well—perhaps you'll laugh at me, Doctor, but the house seems just as much a part of me as do my ancestors."

But the doctor didn't laugh. He looked up at the shining brass knocker on the door, put there three generations before by Luther Davis—the beautiful fanlight above it, and at the small-paned windows of long ago. Then his glance strayed from the century-old elm at one corner of the house to the mammoth syringa bush (the pride of the village as well as of Grandma Davis), at the other, and he understood and sympathized with the girl's loyalty to the home of her forefathers.

Charmian was right. It was a beautiful old house. It stood a fair road from the street, though it was built in the days when most Wickfield dwellings were set flush with the sidewalk. Charmian's great-great-grandfather had explained (when curious neighbors commented on this fact), that he was unwilling to sacrifice the young elm tree but most of his questioners suspected that the underlying reason for this unusual proceeding was because great-great-grandma Davis "hated dust."

This, at least, was the story that had come down to Charmian, who declared that if her great-great-grandmother could have foretold the dust of the present day with automobiles

passing at forty miles an hour, she would have set her mansion in what was then the cow pasture!

"But if she had," commented Grandma Davis wisely, "it wouldn't have been near so handy for the shop."

Charmian smiled. The shop, which was once the honored parlor of the old Davis house, was an innovation against which Grandma had bitterly rebelled when it was first suggested by Charmian's widowed mother. At that time Charmian was but a little maid of six, yet she remembered vividly the battle that took place before Grandma Davis capitulated to her daughter-in-law's irrefutable argument that it was more honorable for a Davis to run a shop in the best room than to go into debt.

She remembered also the day when the fine imported carpet was removed, and the contents of the highboy taken "up attic" in order to make room for the rolls of calico—the spools of silk and cotton—the pins and needles—bright worsteds and other fascinating odds and ends which were to be paid for "by installment," whatever that was.

Wickfield was in sore need of a dry goods store, for Henry Oldham, who had run the general store for forty years, rarely replenished his stock, and one had to drive clear to Eastboro in order to match a skein of yarn!

Hence the neighbors, after a moment's shocked surprise, welcomed the thought of buying their fancy goods of Charmian's mother; and as Grandma grew older, the little shop, against which she had fought so valiantly, became her greatest source of entertainment.

Charmian was fifteen when her mother died, but she managed to finish high school, to go to the State Normal at Eastboro, and keep house for Grandma, while the old lady sat contentedly in the front window and waited on occasional customers, unless, as was usually the case, they waited on themselves. Indeed the Davis house would hardly have seemed natural without Grandma's face peering from behind that twenty-four-paned window. Once, stepping in upon an errand, Ezra Bascomb had offered to put a whole pane of glass in the lower sash, so she could see the passing better.

"I could do it easy enough some holiday," he urged; but the old lady shook her head.

"It's real kind of you, Ezra," she said gratefully, "but my husband's grandfather, Luther Davis, built this house, and I've never felt called to want it changed. Seems as if one pane of glass wouldn't exactly suit it, though I've no doubt Charmian would find it easier to clean. Charmian's terribly particular about windows. She says a soiled window can just spoil a nice, sunny morning; and I dunno but what she's right. Once when she was a little girl she gave me a wiper for my spectacles. It said on it: 'The world will never look quite right unless you keep your glasses bright,' and I presume the same thing applies to windows. No, Ezra, I'm just as obliged to you, but I guess we'll stick to Grandpa Davis's old windows, Charmian thinks the world and all of them."

"Well," responded Ezra, good-naturedly, "there's no accounting for taste. Now the first thing Emmy wanted when we was married, was for me to yank those small-paned windows out o' the old house, and put in new ones. She's kept at me ever since, and at last I've done it; and I will say, Grandma, that they look handsome. But that city feller, who's living down at Irving Plummer's, acted like I'd broke all ten commandments when I suggested changin' the windows along with the other improvements he's put in. No, there's no accounting for taste. He bought the place and furnishings as they stood, and he's give Hetty Plummer's golden oak extension table, the one she sent clear to Portland for, to his hired man, and he's usin' an old mahogany drop-leaf that Grandma Plummer kep' her preserves on in the cellar!"

"Do tell!"

"Yes, ma'am," replied Ezra, moving toward the door, "that's Gospel truth, or may I be struck dead where I stand."

He felt in his pocket for his cap, and drew out a scrap of bright blue silk.

"Gorry! I clean forgot what I was here for. Emmy wants a spool o' silk to match this sample. She's makin' her new waist to wear to the strawberry festival."

"Let's see," said Grandma eagerly, stretching out a hand for the sample.

"That's real pretty. Emmy always did look best in blue, even when she was a baby. You open the top drawer, Ezra, and find a spool to match."

"Emmy said," hesitated Ezra, like a well-trained husband, "that I was to let Charmian pick it out. She says I ain't got an eye for color."

Grandma chuckled.

"And I suppose she won't trust me, either. I donno as I blame her. My eyes are getting old along with the rest of me. Charmian's up attic. You whistle at the back stairs and she'll come down. There! she's coming now. 'Dearie,' she called, 'you come right here. Emmy Bascomb wants you should pick out a spool o' silk to match her waist. Seems to me I remember the blues are getting sort of low.'"

Yes, the little shop had been Grandma's unfailing source of entertainment for many years. Even when with the invasion of automobiles, Eastboro became more accessible, the neighbors did what shopping they could at Grandma's, not only to help her out, but to make an excuse for running in to chat during the long days when Charmian was away at school. If, nineteen years before, Wickfield had been shocked at the thought of a shop in Lawyer Davis's best room, it had long since become as accustomed to it as had Grandma herself; though at times the old lady wondered, with an inner chuckle, what her husband's father was thinking as he viewed the change from his mansion in the Eternal City.

For Roger Davis had been a lawyer—a man of education. His office, a small, one-story building, still stood across the drive that led to the big barn. He had been what in those days was called "a scholar and a gentleman," but, although he sent his son to college, "Grandpa Davis," after a year of reading law in his father's office, had "gone back to the land"; and being more of a dreamer than a worker, he left the old place rather worse off than when he fell heir to it. For he had found it pleasanter as well as easier, to let his horses rest when they should have been dragging the plow, while he feasted his beauty-loving eyes on the hills that surrounded Wickfield on every side, and composed "poetry."

Grandma was very proud of Grandpa's poems. Once one of them was printed in the Eastboro "Telegraph," and the minister read it from the pulpit. That was a proud day for Grandma Davis. She still kept a clipping of the poem between the pages of her Bible, and read it every night after she said her prayers. To her loyal heart it was a legacy more beautiful than gold or precious stones.

And now, though she and Charmian were left alone in the big house, it never occurred to them to leave it. To Grandma it was "home." To the girl it was not only home, but something that gave her a sense of satisfying pride. For was it not something to be proud of, to live in a house built by ones great-great-grandfather? This alone was compensation for the things she lacked—things that were, to many a girl of her age, the breath of life.

(To Be Continued.)

### Check Falling Hair with Minard's.

#### Fish Freezing Plant

A plant for the cleaning, filleting and freezing of fish will be set up in Edmonton shortly, according to "The Journal," quoting A. S. Duclos, president of the Edmonton Cold Storage Company, and director of the Pacific Coast Terminals Cold Storage Company.

### Whaling Up-To-Date

#### Airplanes Being Used As Scouts By Norwegian Fleet

A Norwegian whaling fleet now at work off the ice banks of the Antarctic is accompanied by two aeroplanes which are being used to scout for schools of whales. It has been found that in certain years the whales are much more difficult to find than in others; in fact, they seem practically to disappear, and it is hoped that the aeroplane with its greater mobility and wide range of vision will be able to help in solving the problem. The machines can be equipped with three sets of landing gear: wheels for landing on the deck of the "mother" vessel, pontoons for the water, and skis for the ice. A wireless "there she blows" will summon the fleet when the aeroplanes sight their quarry.

### IF THERE IS A BABY IN YOUR HOME

#### There Also Should Be a Box Of Baby's Own Tablets

To keep her little ones well is the constant aim of every mother and to help her in this task she should always keep a box of Baby's Own Tablets in the home. These Tablets have saved many little lives when illness came on suddenly.

The majority of troubles which afflict little ones are those which arise from a disordered condition of the stomach and bowels. It is in quickly correcting these disorders that Baby's Own Tablets show their value. They banish constipation and indigestion; correct colic and diarrhoea; break up colds and simple fevers and allay teething pains. Concerning the Tablets Mrs. E. Roberts, Cap. aus Os, Que., writes:—"I always keep Baby's Own Tablets in the house as I know of nothing to equal them for little ones."

The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

### Seven Hundred Mile Line

#### Length Of Surveyed Boundary Between Alberta and Saskatchewan

The boundary between Alberta and Saskatchewan is the Fourth Meridian of the Dominion Lands survey system, which coincides approximately with the 110th meridian of west longitude and under instructions from the Surveyor-General, Department of the Interior, has been surveyed from the International Boundary northerly to Lake Athabasca, a distance in a straight line of nearly seven hundred miles, constituting one of the longest surveyed straight lines in the world.

Miller's Worm Powders will eradicate the worm evil that bears so heavily on children and is believed to cause many fatalities. They are an acceptable medicine to children and can be fully relied upon to clear the food channels thoroughly of these destructive parasites and restore the inflamed and painful surfaces to healthfulness. They are an excellent remedy for these evils.

### A Remarkable Exhibit

#### Edmonton Has Fine Display Of Northern Grains and Grasses

Grown 300 miles north of Edmonton, as the crow flies, at the Dominion Experimental Farm, at Fort Vermillion, Alberta, on the Peace River, a most remarkable display of grains and grasses of last season's crop are on display at the Edmonton Chamber of Commerce.

Exhibits include thirteen varieties of wheat grown in experimental plots; eight of oats, five of barley, two of flax and two of rye. The wheat includes such well known varieties as Garnet, Red Fife, Marquis, etc., and the oats include Banner, Leader, Victory and two varieties of hull-less oats—Laurel and Liberty.

Twelve of the 13 varieties of wheat sown April 30, the other, Marquis, May 8. Three of the varieties were cut August 15; significant that Marquis, sown eight days later than all the other varieties ripened as rapidly as two others sown eight days earlier—Kitchener and Red Fife.

All samples are of excellent quality, with strong root growth, sturdy stands and plump, well-filled heads, with heads ripened perfectly.

### Calgary's Building Permits

Calgary's building permits for the year numbered 1,883 and had a recorded value of \$11,417,194, compared with 484 in 1928, with a value of \$6,302,142 for 1928.

writes Susan Salino, Thousands say new Ironized Yeast adds 3 to 15 lbs. in 3 weeks. Skin clears like magic. Constipation, nerves, end. Get pleasant Ironized Yeast tablets from druggist today.

### Little Helps For This Week

"The Lord our God will we serve, and His voice will we obey." — Joshua xxiv. 24.

So nigh is grandeur to our dust,  
So near is God to man,  
When duty whispers low, "Thou must,"  
The youth replies, "I can."  
—Ralph Waldo Emerson.

When in the crises of your duty the way of peace and right summons you with its sweet compulsion, it is the call of the Eternal Right making itself heard in your waking soul. It is the summons of God through the voice of duty. Not far away lie the evidences of the stars, or seas, or ancient man, but here amid the inevitable experiences of our daily mistakes, and of our sincere repentances. The life of God and the life of man are all interwoven in the web of human experiences.—Francis G. Peabody.

### Cost Of Translations

#### French and German Cheapest, and Finnish Is Dearest

Language experts should find something to interest them in the tariff of a translation firm I have just been looking over, writes "Looker On" in the London "Daily Chronicle." French and German, it seems, are the cheapest languages to translate. Italian and Spanish are a little dearer, and Dutch and the Scandinavian languages come next on the list of charges. Greek translations cost considerably more than Russian—they rank in cost with Rumanian, Hungarian, Serbian and Czech. Lithuanian comes next, while Finnish, "dearest" language of all, costs about eight times as much as French.

**Exhausted From Asthma.** Many who read these words know the terrible drain upon health and strength, which comes in the train of asthmatic troubles. Many do not realize, however, that there is one true remedy which will usually stop this drain. Dr. J. D. Kellogg's Asthma Remedy is a wonderful check to this enervating ailment. It has a countless record of relief to its credit. It is sold almost everywhere.

### Measured the Earth

The earth is not round after all. It is flattened at the poles, and has quite a pronounced heaviness about the middle. A. H. Miller, a Canadian scientist attached to the Dominion Observatory, in Ottawa, has completed measurements this year which show the diameter through the poles is 26 miles less than through the equator.

### Was In Bed All Summer

"I have to work in the store and do my own housework, too, and I got nervous and run-down and was in bed nearly all summer. The least noise would make me nervous. I was told to take Lydia E. Pinkham's Vegetable Compound and I have taken seven bottles. It has made me stronger and put more color into my face. I am looking after my store and housework and my four children and I am getting along nicely now."  
—Mrs. J. Malin, R. R. No. 5, Barton St. East, Hamilton, Ontario, Canada.

**Lydia E. Pinkham's Vegetable Compound**  
Lydia E. Pinkham Med. Co., Lynn, Mass., U. S. A., and Cobourg, Ontario, Canada.

### Falling Hair

Turn to a proven hair grower—Minard's of course. Will cleanse scalp of dandruff and promote a healthy, glossy growth. Rub into scalp four times weekly.

This will be the opportunity of a lifetime. A help to husbands! A boon to bachelors! A lesson to lovers!

DON'T MISS IT

## THE ROARIN' GAME AND THE GAME OF LIFE

(Continued From Last Week)

Perhaps someone is inclined to ask why do some men never make good curlers? Many factors enter into an intelligent answer to this question. Some men are so constituted that they can never get away from the eternal ego. They simply cannot loose themselves to another's leadership. Some are too lacadaisical and indifferent to be good players in any game. They lack the necessary enthusiasm. Some are handicapped by some physical defect. They are too stiff and awkward. Some are handicapped by some mental defect so that they cannot read intelligently what the skip is asking for. Besides they are not good judges of weight. Some are too nervous; and some want an alibi for every miss. Such are a few of the things which prevent men from becoming expert curlers. In the great game of life men suffer under similar handicaps, but I must not take time to deal with these.

In curling there is no second chance. Sometimes a player's foot slips when he is delivering a rock, or it strikes his leg and curves to the side. That stone is removed from the ice. He cannot play it again. "What's done cannot be undone." In all our games there is no provision for a second chance. Where can we go to find a truth or principle helpful to those who slip up in the game of life? The poet Dante in his great poem *Divina Commedia*, descends into Hell, and under the faithful guidance of the beloved Beatrice enters the abode of the blessed; and is able out of his exuberant imagination to find analogy, symbol, and interpretation for all things in Heaven and in earth. But at last he came to the Cross of Christ, and here the idea of God's mercy and God's love was so high, and so deep, and so tender that even Dante's tremendous imagination failed to comprehend it, and he exclaimed "The pattern fails me now." And so in applying the game of curling to the game of life, I am compelled to say with Dante, "The pattern fails me now," for there is nothing in curling that teaches redemption. There is only one place where the great truth is taught, and that is in the word of God. That book gives to us the story of the potter and the clay. It shows us how the potter has power to make from the same lump one vessel for a noble purpose, and another for a menial. But it also shows us how the potter can take the marred and broken vessel, and remould and refashion it, and make of it a vessel meet for the Master's use. So I say to you fellow curlers, there is a necessity for us to put our lives under the guiding hands of the great potter, and allow Him to make of us what he will. Let us play

up and play the game.

One of the finest points in the game is that of guarding a stone on the tee. It is often necessary, as many of you know, to so place a stone in front of another stone that is resting on the tee that the opposing player cannot remove the stone that is being guarded. That suggests this fact, that in the game of life there are certain vital interests that must be guarded if we are to make the best of life. Some little time ago I was in the rink one night waiting to go on with our game. While waiting a discussion arose between the rinks as to the advisability of proceeding with our game that night. The ice was wet and heavy, and no one was particularly anxious to proceed with the game under the circumstances, when one of the opposing curlers chiefly for my benefit, suggested that we postpone the game and play it on Sunday night. I learned then that the club had decided when the rink was built to debar all Sunday games from being played in it. A thrill of pride arose in my heart at the spirit of the men, and at the same time a wish that all other clubs had been as wise. The strength and security of our country rests in the sanctity and preservation of the Sabbath day as a day of rest. Abolish the Sabbath and you abolish the church. Abolish the church and you abolish the Bible. Abolish the Bible and the bulwarks of the nation will soon crumble into dust. The Sabbath day with its old time quiet; its freedom from revelry and frivolity; with its opportunity for rest, worship, and meditation, is in need today of being safeguarded. Friends, are we doing it? There are many other things that need guarding. In the sphere of industry; our political rights and privileges. The sacred right of a man to govern himself according to his religious convictions, and not according to the dictates of and clan, class or leader. We need a stone that will safeguard these and many other interests from the ruthless hand of the indifferent and the godless. The man who refuses to take the direction given by his skip. The man whose manhood is not patterned after the great ideal is not safeguarding these interests. You who play with symbols, and yet are not true to the principles these symbols inculcate, are not really guarding these great bulwarks of our church and our nation.

Another rule of our game and a very suggestive one at that is that the position in which a stone lies on the tee in regard to its distance from the center determines its relative value. You all know as well as I that all measurements are taken from the center of the tee to that part of the stone nearest to that center. A stone is never judged by its relationship to another stone but by its distance from the center of the tee. How true this is to the game of life. In the game of

life we are great imitators. We are inclined to do what others do; and we want to be judged by our nearness to what others are. We excuse our short comings by saying that they are no worse than those of our neighbors. But that standard does not satisfy us on the rink. And when the final stone has been played, and the tally is being estimated, the nearness of our stones to those of our neighbors will not be the deciding factor, but their nearness to the center of the tee. And in the great day we will not be judged by our relative nearness to our neighbors, but by our nearness to Him who is the center of life, of history, and of all our hopes. When Pilate saw Jesus coming down the steps of the Roman Government House he said: "Behold the man." So tonight I say to you, "Behold the Man." "The Lamb of God who taketh away the sin of the world." Behold him as your savior and follow him. He is the captain of your salvation. His standard is the center of the tee in the great game of life. Do your best to get as near to his standard as possible.

Just one word more. You have been playing the game of life for many years. Your day will soon be drawing to its close. The shadows with some of you are already beginning to lengthen. To the best of your ability you have endeavored to follow the instructions of your skip. You have thrust aside many inducements to neglect God, and duty, and religion. At last you realize that your day is nearly done. You have played your last stone, and you have won a great victory. You realize as never before that your success is due entirely to the skill and generalship of your skip. An innumerable host gathers around you with hands outstretched in greeting. Among others I see the hand of your father and mother, and I see also the smiling face and the chubby hand of a little child. But best of all I see the hand of your skip and I hear Him saying as he extends his hand to you, "Well done good and faithful servant." What more can we desire? Friends we dare seek no less. Let us play the game so that when our day is done, and the score announced, we will not be ashamed of the spirit in which we played it, or the result of our efforts.

"Is Jinks careless with his money?"  
"Is he! I've known him to buy bread when he didn't have a drop of gasoline in the tank!"

"Gracious," said the doctor, "How did you get those awful bruises on your shins? Are you a hockey player?"  
"Oh, no, I just led back my wife's weak suit."

Dick—What are you wearing those moccasins for?  
Dolphie—Oh, I'm on the Indian list.

## All Set for Banff Winter Carnival

A Paradise for skiers is a fair description of the country around Banff at this time of year and the dates for the Winter Carnival at that resort have been set with a view to getting the best possible weather results. February 1-8 all eyes will be turned to this beautiful mountain resort. Wonderful scenery and perfect runs are to be found in every direction and there is a special attraction for skiers in the

Mount Norquay Ski Camp which can be reached in thirty minutes flat from Banff by skiers and in about 45 minutes by dog team, taking it easy. Pictures show (1) Banff from the Ski Camp; (2) the camp with a group of enthusiasts; (3) Ike Mills, famous musher, with his "huskieobile"; (4) a typical long ski run near the camp.
